1.1 Intended use

**CAUTION!**

Responsibility for the use of the measuring devices with regard to suitability, intended use and corrosion resistance of the used materials against the measured fluid lies solely with the operator.

**INFORMATION!**

The manufacturer is not liable for any damage resulting from improper use or use for other than the intended purpose.

The **OPTIFLUX 2000** is designed exclusively to measure the flow of electrically conductive, liquid media.

**WARNING!**

If the device is not used according to the operating conditions (refer to chapter Technical data), the intended protection could be affected.

1.2 Certification

CE marking

The device fulfils the statutory requirements of the following EC directives:

- EMC Directive 2004/108/EC in conjunction with EN 61326-1: 2006
- Low Voltage Directive 2006/95/EC in conjunction with EN 61010-1: 2001
- Pressure Equipment Directive 97/23/EC

The manufacturer certifies successful testing of the product by applying the CE marking.

**DANGER!**

For devices used in hazardous areas, additional safety notes apply; please refer to the Ex documentation.

1.3 Safety instructions from the manufacturer

1.3.1 Copyright and data protection

The contents of this document have been created with great care. Nevertheless, we provide no guarantee that the contents are correct, complete or up-to-date.

The contents and works in this document are subject to copyright. Contributions from third parties are identified as such. Reproduction, processing, dissemination and any type of use beyond what is permitted under copyright requires written authorisation from the respective author and/or the manufacturer.

The manufacturer tries always to observe the copyrights of others, and to draw on works created in-house or works in the public domain.

The collection of personal data (such as names, street addresses or e-mail addresses) in the manufacturer's documents is always on a voluntary basis whenever possible. Whenever feasible, it is always possible to make use of the offerings and services without providing any personal data.

We draw your attention to the fact that data transmission over the Internet (e.g. when communicating by e-mail) may involve gaps in security. It is not possible to protect such data completely against access by third parties.

We hereby expressly prohibit the use of the contact data published as part of our duty to publish an imprint for the purpose of sending us any advertising or informational materials that we have not expressly requested.

1.3.2 Disclaimer

The manufacturer will not be liable for any damage of any kind by using its product, including, but not limited to direct, indirect or incidental and consequential damages.

This disclaimer does not apply in case the manufacturer has acted on purpose or with gross negligence. In the event any applicable law does not allow such limitations on implied warranties or the exclusion of limitation of certain damages, you may, if such law applies to you, not be subject to some or all of the above disclaimer, exclusions or limitations.

Any product purchased from the manufacturer is warranted in accordance with the relevant product documentation and our Terms and Conditions of Sale.

The manufacturer reserves the right to alter the content of its documents, including this disclaimer in any way, at any time, for any reason, without prior notification, and will not be liable in any way for possible consequences of such changes.

1.3.3 Product liability and warranty

The operator shall bear responsibility for the suitability of the device for the specific purpose. The manufacturer accepts no liability for the consequences of misuse by the operator. Improper installation and operation of the devices (systems) will cause the warranty to be void. The respective "Standard Terms and Conditions" which form the basis for the sales contract shall also apply.

1.3.4 Information concerning the documentation

To prevent any injury to the user or damage to the device it is essential that you read the information in this document and observe applicable national standards, safety requirements and accident prevention regulations.

If this document is not in your native language and if you have any problems understanding the text, we advise you to contact your local office for assistance. The manufacturer can not accept responsibility for any damage or injury caused by misunderstanding of the information in this document.

This document is provided to help you establish operating conditions, which will permit safe and efficient use of this device. Special considerations and precautions are also described in the document, which appear in the form of underneath icons.

1.3.5 Warnings and symbols used

Safety warnings are indicated by the following symbols.

**DANGER!**

This information refers to the immediate danger when working with electricity.

**DANGER!**

This warning refers to the immediate danger of burns caused by heat or hot surfaces.

**DANGER!**

This warning refers to the immediate danger when using this device in a hazardous atmosphere.

**DANGER!**

These warnings must be observed without fail. Even partial disregard of this warning can lead to serious health problems and even death. There is also the risk of seriously damaging the device or parts of the operator's plant.

**WARNING!**

Disregarding this safety warning, even if only in part, poses the risk of serious health problems. There is also the risk of damaging the device or parts of the operator's plant.

**CAUTION!**

Disregarding these instructions can result in damage to the device or to parts of the operator's plant.

**INFORMATION!**

These instructions contain important information for the handling of the device.

**LEGAL NOTICE!**

This note contains information on statutory directives and standards.

• **HANDLING**

This symbol designates all instructions for actions to be carried out by the operator in the specified sequence.

i **RESULT**

This symbol refers to all important consequences of the previous actions.

1.4 Safety instructions for the operator

**WARNING!**

In general, devices from the manufacturer may only be installed, commissioned, operated and maintained by properly trained and authorized personnel.

This document is provided to help you establish operating conditions, which will permit safe and efficient use of this device.

2.1 Scope of delivery

INFORMATION!

Do a check of the packing list to make sure that you have all the elements given in the order.

INFORMATION!

Inspect the cartons carefully for damages or signs of rough handling. Report damage to the carrier and to the local office of the manufacturer.

INFORMATION!

The remote version will arrive in two cartons. One carton contains the converter and one carton contains the sensor.

Figure 2-1: Scope of delivery

- 1 Ordered flowmeter
- 2 Product documentation
- 3 Factory calibration report
- 4 CD-ROM with product documentation in available languages
- 5 Grounding rings (optional)
- 6 Signal cable (remote versions only)

INFORMATION!

Assembly materials and tools are not part of the delivery. Use the assembly materials and tools in compliance with the applicable occupational health and safety directives.

2.2 Device description

Your measuring device is supplied ready for operation. The factory settings for the operating data have been made in accordance with your order specifications.

The following versions are available:

- Compact version (the signal converter is mounted directly on the measuring sensor)
- Remote version (measuring sensor with connection box and a signal converter in a remote (field) housing)

- 1 Remote version
- 2 Compact version with IFC 300 signal converter
- 3 Compact version with IFC 100 (0°) signal converter
- 4 Compact version with IFC 100 (45°) signal converter

2.3 Nameplate

INFORMATION!

Look at the device nameplate to ensure that the device is delivered according to your order. Check for the correct supply voltage printed on the nameplate.

- 1 Name and address of the manufacturer
- 2 Type designation of the flowmeter and CE sign with number(s) of notified body / bodies
- 3 Calibration data
- 4 PED data

3.1 Notes on installation

**INFORMATION!**

Inspect the cartons carefully for damages or signs of rough handling. Report damage to the carrier and to the local office of the manufacturer.

**INFORMATION!**

Do a check of the packing list to make sure that you have all the elements given in the order.

**INFORMATION!**

Look at the device nameplate to ensure that the device is delivered according to your order. Check for the correct supply voltage printed on the nameplate.

3.2 Storage

- Store the device in a dry and dust-free location.
- Avoid lasting direct exposure to the sun.
- Store the device in its original packaging.
- Storage temperature: -50 ...+70°C / -58...+158°F

3.3 Transport

Signal converter

- No special requirements.

Compact version

- Do not lift the device by the signal converter housing.
- Do not use lifting chains.
- To transport flange devices, use lifting straps. Wrap these around both process connections.

Figure 3-1: Transport

3.4 Pre-installation requirements

Make sure that you have all necessary tools available:

- Allen key (4 mm)
- Small screwdriver
- Wrench for cable glands
- Wrench for wall mounting bracket (remote version only)
- Torque wrench for installing flowmeter in pipeline

3.5 Installation conditions

3.5.1 General requirements

INFORMATION!

The following precautions must be taken to ensure reliable installation.

- *Make sure that there is adequate space to the sides.*
- *Protect the signal converter from direct sunlight and install a sun shade if necessary.*
- *Signal converters installed in control cabinets require adequate cooling, e.g. by fan or heat exchanger.*
- *Do not expose the signal converter to intense vibration. The flowmeters are tested for a vibration level in accordance with IEC 68-2-64.*

3.5.2 Inlet and outlet

Figure 3-2: Recommended inlet and outlet

- 1 ≥ 5 DN
- 2 ≥ 2 DN

3.5.3 Mounting position

Figure 3-3: Mounting position

3.5.4 Flange deviation

CAUTION!

Max. permissible deviation of pipe flange faces:

$$L_{max} - L_{min} \leq 0.5 \text{ mm} / 0.02''$$

Figure 3-4: Flange deviation

- 1 L_{max}
- 2 L_{min}

3.5.5 T-section

Figure 3-5: Distance behind a T-section

$$1 \geq 10 \text{ DN}$$

3.5.6 Vibration

Figure 3-6: Avoid vibrations

3.5.7 Magnetic field

Figure 3-7: Avoid magnetic fields

3.5.8 Bends

Figure 3-8: Installation in bending pipes

Figure 3-9: Installation in bending pipes

3.5.9 Open discharge

Figure 3-10: Installation in front of an open discharge

3.5.10 Control valve

Figure 3-11: Installation in front of a control valve

3.5.11 Air venting

Figure 3-12: Air venting

- 1 ≥ 5 m
- 2 Air ventilation point

3.5.12 Pump

Figure 3-13: Installation behind a pump

3.5.13 Temperatures

**CAUTION!**

Protect the device from direct sunlight.

Temperature range	Process [°C]		Ambient [°C]		Process [°F]		Ambient [°F]	
	min.	max.	min.	max.	min.	max.	min.	max.
Hard rubber / Polyolefin 1								
Separate flow sensor	-5	80	-40	65	23	176	-40	149
Compact with IFC 300	-5	80	-40	65	23	176	-40	149
Compact with IFC 100	-5	80	-40	65	23	176	-40	149
Polypropylene 2								
Separate flow sensor	-5	90	-40	65	23	194	-40	149
Compact with IFC 300	-5	90	-40	65	23	194	-40	149
Compact with IFC 100	-5	90	-40	65	23	194	-40	149

1 Polyolefin is only available for DN200...1000

2 Polypropylene is only available for DN25...150

3.6 Mounting

3.6.1 Torques and pressures

The maximum pressure and torques values for the flowmeter are theoretical and calculated for optimum conditions and use with carbon steel flanges.

Figure 3-14: Tightening of bolts

Tightening of bolts

- Always tighten the bolts uniformly and in diagonally opposite sequence.
- Do not exceed the maximum torque value.
- Step 1: Apply approx. 50% of max. torque given in table.
- Step 2: Apply approx. 80% of max. torque given in table.
- Step 3: Apply 100% of max. torque given in table.

Nominal size DN [mm]	Pressure rating	Bolts	Max. torque [Nm] ¹		
			Polyolefin	Polypropylene	Hard rubber
25	PN 40	4 × M 12	-	22	11
32	PN 40	4 × M 16	-	37	19
40	PN 40	4 × M 16	-	43	25
50	PN 40	4 × M 16	-	55	31
65	PN 16	4 × M 16	-	51	42
65	PN 40	8 × M 16	-	38	21
80	PN 40	8 × M 16	-	47	25
100	PN 16	8 × M 16	-	39	30
125	PN 16	8 × M 16	-	53	40
150	PN 16	8 × M 20	-	68	47
200	PN 10	8 × M 20	68	-	68
200	PN 16	12 × M 20	45	-	45
250	PN 10	12 × M 20	65	-	65
250	PN 16	12 × M 24	78	-	78
300	PN 10	12 × M 20	76	-	76
300	PN 16	12 × M 24	105	-	105
350	PN 10	16 × M 20	75	-	75
400	PN 10	16 × M 24	104	-	104
450	PN 10	20 × M 24	93	-	93
500	PN 10	20 × M 24	107	-	107
600	PN 10	20 × M 27	138	-	138
700	PN 10	24 × M 27	163	-	163
800	PN 10	24 × M 30	219	-	219
900	PN 10	28 × M 30	205	-	205
1000	PN 10	28 × M 33	261	-	261

¹ The specified torque values are dependent on variables (temperature, bolt material, gasket material, lubricants, etc.) which are not within the control of the manufacturer. Therefore these values should be regarded as indicative only.

INFORMATION!

Other sizes / pressure ratings on request.

Nominal size [inches]	Flange class [lb]	Bolts	Max. torque [lbf.ft] ¹		
			Polyolefin	Polypropylene	Hard rubber
1	150	4 × 1/2"	-	6.7	3.2
1 1/2	150	4 × 1/2"	-	13	9
2	150	4 × 5/8"	-	24	17
3	150	4 × 5/8"	-	43	29
4	150	8 × 5/8"	-	34	23
6	150	8 × 3/4"	-	61	38
8	150	8 × 3/4"	51	-	51
10	150	12 × 7/8"	58	-	58
12	150	12 × 7/8"	77	-	77
14	150	12 × 1"	69	-	69
16	150	16 × 1"	67	-	67
18	150	16 × 1 1/8"	105	-	105
20	150	20 × 1 1/8"	94	-	94
24	150	20 × 1 1/4"	133	-	133

¹ The specified torque values are dependent on variables (temperature, bolt material, gasket material, lubricants, etc.) which are not within the control of the manufacturer. Therefore these values should be regarded as indicative only.

INFORMATION!

Other sizes / pressure ratings on request.

4.1 Safety instructions

DANGER!

All work on the electrical connections may only be carried out with the power disconnected. Take note of the voltage data on the nameplate!

DANGER!

Observe the national regulations for electrical installations!

DANGER!

For devices used in hazardous areas, additional safety notes apply; please refer to the Ex documentation.

WARNING!

Observe without fail the local occupational health and safety regulations. Any work done on the electrical components of the measuring device may only be carried out by properly trained specialists.

INFORMATION!

Look at the device nameplate to ensure that the device is delivered according to your order. Check for the correct supply voltage printed on the nameplate.

4.2 Grounding

DANGER!

The device must be grounded in accordance with regulations in order to protect personnel against electric shocks.

Figure 4-1: Grounding

- 1 Metal pipelines, not internally coated. Grounding without grounding rings.
- 2 Metal pipelines with internal coating and non-conductive pipelines. Grounding with grounding rings.

Figure 4-2: Different types of grounding rings

- 1 Grounding ring number 1
- 2 Grounding ring number 2
- 3 Grounding ring number 3

Grounding ring number 1:

- 3 mm / 0.1" thick (tantalum: 0.5 mm / 0.02")

Grounding ring number 2:

- 3 mm / 0.1" thick
- Prevents damage to the flanges during transport and installation
- Especially for flow sensors with PTFE liner

Grounding ring number 3:

- 3 mm / 0.1" thick
- With cylindrical neck (length 30 mm / 1.25" for DN10...150 / 3/8...6")
- Prevents damage to the liner when abrasive liquids are used

4.3 Virtual reference for IFC 300 (C, W and F version)

The virtual reference option on the IFC 300 flow converter provides complete isolation of the measurement circuit.

Benefits of virtual reference:

- Grounding rings or grounding electrodes can be omitted.
- Safety increases by reducing the number of potential leakage points.
- The installation of the flowmeters is much easier.

Figure 4-3: Virtual reference

Minimum requirements:

- Size: \geq DN10
- Electrical conductivity: $\geq 200 \mu\text{S/cm}$
- Electrode cable: max. 50 m / 164 ft, type DS

4.4 Connection diagrams

INFORMATION!

For the connection diagrams please refer to the documentation of the applicable converter.

5.1 Spare parts availability

The manufacturer adheres to the basic principle that functionally adequate spare parts for each device or each important accessory part will be kept available for a period of 3 years after delivery of the last production run for the device.

This regulation only applies to spare parts which are subject to wear and tear under normal operating conditions.

5.2 Availability of services

The manufacturer offers a range of services to support the customer after expiration of the warranty. These include repair, maintenance, technical support and training.

INFORMATION!

For more precise information, please contact your local representative.

5.3 Returning the device to the manufacturer

5.3.1 General information

This device has been carefully manufactured and tested. If installed and operated in accordance with these operating instructions, it will rarely present any problems.

CAUTION!

Should you nevertheless need to return a device for inspection or repair, please pay strict attention to the following points:

- *Due to statutory regulations on environmental protection and safeguarding the health and safety of our personnel, manufacturer may only handle, test and repair returned devices that have been in contact with products without risk to personnel and environment.*
- *This means that the manufacturer can only service this device if it is accompanied by the following certificate (see next section) confirming that the device is safe to handle.*

CAUTION!

If the device has been operated with toxic, caustic, flammable or water-endangering products, you are kindly requested:

- *to check and ensure, if necessary by rinsing or neutralizing, that all cavities are free from such dangerous substances,*
- *to enclose a certificate with the device confirming that it is safe to handle and stating the product used.*

5.3.2 Form (for copying) to accompany a returned device

Company:		Address:	
Department:		Name:	
Tel. no.:		Fax no.:	
Manufacturer's order no. or serial no.:			
The device has been operated with the following medium:			
This medium is:	water-hazardous		
	toxic		
	caustic		
	flammable		
	We checked that all cavities in the device are free from such substances.		
	We have flushed out and neutralized all cavities in the device.		
We hereby confirm that there is no risk to persons or the environment through any residual media contained in the device when it is returned.			
Date:		Signature:	
Stamp:			

5.4 Disposal

**CAUTION!**

Disposal must be carried out in accordance with legislation applicable in your country.

6.1 Measuring principle

An electrically conductive fluid flows inside an electrically insulated pipe through a magnetic field. This magnetic field is generated by a current, flowing through a pair of field coils. Inside of the fluid, a voltage U is generated:

$$U = v * k * B * D$$

in which:

v = mean flow velocity

k = factor correcting for geometry

B = magnetic field strength

D = inner diameter of flow meter

The signal voltage U is picked off by electrodes and is proportional to the mean flow velocity v and thus the flow rate q . A signal converter is used to amplify the signal voltage, filter it and convert it into signals for totalising, recording and output processing.

- 1 Induced voltage (proportional to flow velocity)
- 2 Electrodes
- 3 Magnetic field
- 4 Field coils

6.2 Technical data

INFORMATION!

- The following data is provided for general applications. If you require data that is more relevant to your specific application, please contact us or your local representative.
- Additional information (certificates, special tools, software,...) and complete product documentation can be downloaded free of charge from the website (Download Center).

Measuring system

Measuring principle	Faraday's law of induction
Application range	Electrically conductive fluids
Measured value	
Primary measured value	Flow velocity
Secondary measured value	Volume flow

Design

Features	Fully welded maintenance-free sensor.
	Large diameter range DN25...3000
	Rugged liners approved for drinking water.
	Large standard range but also available in customer specific diameter, length and pressure rating.
Modular construction	The measurement system consists of a flow sensor and a signal converter. It is available as compact and as separate version. More information about the signal converter can be found in the relevant documentation.
Compact version	With IFC 100 converter: OPTIFLUX 2100 C
	With IFC 300 converter: OPTIFLUX 2300 C
Remote version	In wall (W) mount version with IFC 100 converter: OPTIFLUX 2100 W
	In field (F), wall (W) or rack (R) mount version with IFC 300 converter: OPTIFLUX 2300 F, W or R
Nominal diameter	With IFC 100 converter: DN25...1200 / 1...48"
	With IFC 300 converter: DN25...3000 / 1...120"

Measuring accuracy

Reference conditions	Flow conditions similar to EN 29104	
	Temperature: +10...+30°C / +50...+86°F	
	Electrical conductivity: $\geq 300 \mu\text{S}/\text{cm}$	
Maximum measuring error	IFC 100: down to 0.3% of the measured value $\pm 1 \text{ mm/s}$	
	IFC 300: down to 0.2% of the measured value $\pm 1 \text{ mm/s}$	
	The maximum measuring error depends on the installation conditions.	
	For detailed information refer to <i>Measuring accuracy</i> on page 38.	
Repeatability	$\pm 0.1\%$ of MV, minimum 1 mm/s	
Calibration / Verification	Standard:	
	Each meter is standard calibrated by a direct volume comparison.	
	Optional:	
	Verification to Measurement Instrument Directive (MID), Annex MI-001. Standard: Verification at Ratio (Q3/Q1) = 80, Q3 $\geq 2 \text{ m/s}$ Optional: Verification at Ratio (Q3/Q1) > 80 on request	
	Only in combination with the IFC 300 signal converter.	
MID Annex MI-001 (Directive 2004/22/EC)	EC-Type examination certificate to MID Annex MI-001	
	Only in combination with the IFC 300 signal converter.	
	Diameter range: DN25...500	
	Forward and reverse (bi-directional) flow	
	Orientation: any	
	Liquid temperature range: +0.1°C / 50°C For detailed information refer to <i>Legal metrology</i> on page 33.	
OIML R49	Certificate of conformity to OIML R49	
	Only in combination with the IFC 300 signal converter.	
	Diameter range	Class 1: DN80...500 Class 2: DN25...50
	Forward and reverse (bi-directional) flow	
	Orientation: any	
	Liquid temperature range: +0.1°C / 50°C	
	For detailed information refer to <i>Legal metrology</i> on page 33.	

Operating conditions

Temperature	
	For Ex versions different temperatures are valid. Please refer to the relevant Ex documentation for details.
Process temperature	Hard rubber liner: -5...+80°C / 23...+176°F
	Polypropylene liner: -5...+90°C / 23...+194°F
	Polyolefin liner: -5...+80°C / 23...+176°F
Ambient temperature	Standard (with aluminium converter housing):
	-40...+65°C / -40...+149°F
	Protect electronics against self-heating at ambient temperatures above 55°C
	Option (with stainless steel converter housing):
	-40...+55°C / -40...+130°F
Storage temperature	-50...+70°C / -58...+158°F
Measurement range	-12...+12 m/s / -40...+40 ft/s
Pressure	
EN 1092-1	DN2200...3000: PN 2.5
	DN1200...2000: PN 6
	DN200...1000: PN 10
	DN65 and DN100...150: PN 16
	DN25...50 and DN80: PN 40
	Other pressures on request
ASME B16.5	1...24": 150 & 300 lb RF
	Other pressures on request
JIS	DN50...1000 / 2...40": 10 K
	DN25...40 / 1...1½": 20 K
	Other pressures on request
AWWA (class B or D FF)	Option:
	DN700...1000 / 28...40": ≤ 10 bar / 145 psi
	DN1200...2000 / 48...80": ≤ 6 bar / 87 psi
Vacuum load	For detailed information refer to <i>Vacuum load</i> on page 42.
Pressure loss	Negligible
Chemical properties	
Physical condition	Electrically conductive liquids
Electrical conductivity	Standard: ≥ 5 µS/cm
	Demineralized water: ≥ 20 µS/cm
Permissible gas content (volume)	IFC 100: ≤ 3%
	IFC 300: ≤ 5%
Permissible solid content (volume)	IFC 100: ≤ 10%
	IFC 300: ≤ 70%

Installation conditions

Installation	Assure that the flow sensor is always fully filled.
	For detailed information refer to <i>Installation</i> on page 11.
Flow direction	Forward and reverse
	Arrow on flow sensor indicates flow direction.
Inlet run	≥ 5 DN
Outlet run	≥ 2 DN
Dimensions and weights	For detailed information refer to <i>Dimensions and weights</i> on page 39.

Materials

Sensor housing	Sheet steel
	Other materials on request
Measuring tube	Austenitic stainless steel
Flanges	Carbon steel
	Other materials on request
Liner	Standard:
	DN25...150 / 1...6": polypropylene
	DN200...3000 / 8...120": hard rubber
	Option:
	DN25...150 / 1...6": hard rubber DN200...1000 / 8...40": polyolefin
Protective coating	On exterior of the meter: flanges, housing, signal converter (compact version) and / or connection box (field version)
	Standard: polyurethane coating
	Option: subsoil coating, offshore coating
Connection box	Only for remote versions
	Standard: die-cast aluminium
	Option: stainless steel
Measuring electrodes	Standard: Hastelloy® C
	Option: stainless steel, titanium
	Other materials on request
Grounding rings	Standard: stainless steel
	Option: Hastelloy® C, titanium, tantalum
	Grounding rings can be omitted with virtual reference option for the IFC 300 signal converter.
Reference electrode (optional)	Standard: Hastelloy® C
	Option: stainless steel, titanium
	Other materials on request

Process connections

Flange	
EN 1092-1	DN25...3000 in PN 2.5...40
ASME	1...24" in 150 & 300 lb RF
JIS	DN25...1000 in 10...20 K
AWWA	DN700...2000 in 6...10 bar
Design of gasket surface	RF
	Other sizes or pressure ratings on request.

Electrical connections

	For full details, including power supply and power consumption etc., see technical datasheet of the relevant signal converter.
Signal cable (remote versions only)	
Type A (DS)	In combination with the IFC 100 and IFC 300 signal converter
	Standard cable, double shielded. Max. length: 600 m / 1950 ft (dep. on electrical conductivity and measuring sensor).
	For detailed information refer to the documentation of the relevant signal converter.
Type B (BTS)	Only in combination with the IFC 300 signal converter
	Optional cable, triple shielded. Max. length: 600 m / 1950 ft (dep. on electrical conductivity and measuring sensor).
	For detailed information refer to the documentation of the relevant signal converter.
I/O	For full details of I/O options, including data streams and protocols, see technical datasheet of the relevant signal converter.

Approvals and certificates

CE	
	This device fulfils the statutory requirements of the EC directives. The manufacturer certifies successful testing of the product by applying the CE mark.
Electromagnetic compatibility	Directive: 2004/108/EC, NAMUR NE21/04
	Harmonized standard: EN 61326-1 : 2006
Low voltage directive	Directive: 2006/95/EC
	Harmonized standard: EN 61010 : 2001
Pressure equipment directive	Directive: 97/23/EC
	Category I, II, III or SEP
	Fluid group 1
	Production module H

Hazardous areas	
ATEX	Please check the relevant Ex documentation for details.
	Compact version with IFC 100 signal converter
	II 2 GD
	Compact version with IFC 300 signal converter
	II 2 GD or II 2(1) GD
	Remote version
	II 2 GD
FM	In combination with IFC 300 signal converter
	Class I, Div. 2, Groups A, B, C and D
	Class II, Div. 2, Groups F and G
	Class III, Div. 2, Groups F and G
CSA	In combination with IFC 300 signal converter
	Class I, Div. 2, Groups A, B, C and D
	Class II, Div. 2, Groups F and G
NEPSI	GYJ05234 / GYJ05237
	Ex me ia IIC T6...T3
	Ex de ia II T6...T3
	Ex qe ia IIC T6...T3
	Ex e ia IIC T6...T3
Other approvals and standards	
Custody transfer	Only in combination with the IFC 300 signal converter.
	MID Annex MI-001 type examination certificate
	OIML R49 certificate of conformity
	Conformity with ISO 4064 and EN 14154
Drinking water approvals	Hard rubber liner: NSF / ANSI standard 61
	Polypropylene liner: ACS, KIWA, KTW, NSF / ANSI standard 61, WRAS
	Polyolefin liner: ACS, KTW, DVGW-W270, WRAS (in preparation)
Protection category acc. to IEC 529 / EN 60529	Standard:
	IP66 / 67 (NEMA 4/4X/6)
	Option:
	IP68 (NEMA 6P)
	IP68 is only available for separate design and with a stainless steel connection box.
Shock test	IEC 68-2-27
	30 g for 18 ms
Vibration test	IEC 68-2-64
	f = 20 - 2000 Hz, rms = 4.5 g, t = 30 min.

6.3 Legal metrology

INFORMATION!

OIML R49 and MID Annex MI-001 is **only** available in combination with the IFC 300 signal converter!

6.3.1 OIML R49

The OPTIFLUX 2000 has a certificate of conformity with the international recommendation OIML R49. The certificate has been issued by NMI (Dutch board of weight and measures). The OIML R49 recommendation (2006) concerns water meters intended for the metering of cold potable and hot water. The measuring range of the flowmeter is determined by Q_3 (nominal flow rate) and R (ratio).

The OPTIFLUX 2000 meets the requirements for water meters of accuracy class 1 and 2.

- For accuracy class 1, the maximum permissible error for water meters is $\pm 1\%$ for the upper flow rate zone and $\pm 3\%$ for the lower flow rate zones.
- For accuracy class 2, the maximum permissible error for water meters is $\pm 2\%$ for the upper flow rate zone and $\pm 5\%$ for the lower flow rate zones.

According to OIML R49, accuracy class 1 designation shall be applied only to flowmeter with $Q_3 \geq 100 \text{ m}^3/\text{h}$.

$$Q_1 = Q_3 / R$$

$$Q_2 = Q_1 * 1.6$$

$$Q_3 = Q_1 * R$$

$$Q_4 = Q_3 * 1.25$$

Figure 6-1: ISO flow rates added to figure as comparison towards OIML

X: Flow rate

Y [%]: Maximum measuring error

1 $\pm 3\%$ for class 1, $\pm 5\%$ for class 2 devices

2 $\pm 1\%$ for class 1, $\pm 2\%$ for class 2 devices

OIML R49 Class 1

DN	Span (R)	Flow rate [m ³ /h]			
		Minimum Q1	Transitional Q2	Permanent Q3	Overload Q4
80	640	0.25	0.40	160	200.0
100	625	0.40	0.60	250	312.5
150	667	0.60	1.00	400	500.0
250	1000	1.60	2.60	1600	2000.0
500	500	12.60	20.20	6300	7875.0

OIML R49 Class 2

DN	Span (R)	Flow rate [m ³ /h]			
		Minimum Q1	Transitional Q2	Permanent Q3	Overload Q4
25	400	0.040	0.064	16	20.0
50	400	0.100	0.160	40	50.0

6.3.2 MID Annex MI-001

All new designs of water meters that are to be used for legal purposes in Europe require certification under the Measurement Instrument Directive (MID) 2004/22/EC. Annex MI-001 of the MID applies to water meters intended for the measurement of volume of clean, cold or heated water in residential, commercial and light industrial use. An EC-type examination certificate is valid in all countries of the European Union.

The OPTIFLUX 2300 has an EC-type examination certificate and can be verified to the MID Annex MI-001 for water meters with diameter DN25...DN300. The conformity assessment procedure followed for OPTIFLUX 2300 is Module B (Type Examination) and Module D (Quality Assurance of the Production Process).

The maximum permissible error on volumes delivered between Q2 (transitional) flow rate and Q4 (overload) flow rate is $\pm 2\%$.

The maximum permissible error on volumes delivered between Q1 (minimum) flow rate and Q2 (transitional) flow rate is $\pm 5\%$.

$$Q1 = Q3 / R$$

$$Q2 = Q1 * 1.6$$

$$Q3 = Q1 * R$$

$$Q4 = Q3 * 1.25$$

Figure 6-2: ISO flow rates added to figure as comparison towards MID

X: Flow rate

Y [%]: Maximum measuring error

MI-001 certified flow characteristics

200	80	3.125	5.000	250
250	80	5.000	8.000	400
300	80	7.875	12.600	630
350	80	12.500	20.000	1000
400	80	12.500	20.000	1000
450	80	20.000	32.000	1600
500	80	20.000	32.000	1600

6.4 Measuring accuracy

Each flowmeter is standard wet calibrated under reference conditions by direct volume comparison. The performance of the flowmeter is defined and documented in an individual water meter calibration certificate.

Reference conditions

- Medium: water
- Temperature: +10...30°C / +50...86°F
- Operating pressure: 1 bar / 14.5 psi
- Inlet section: ≥ 5 DN

Figure 6-3: Flow velocity vs. accuracy
 X [m/s] : flow velocity
 Y [%]: deviation from the actual measured value (mv)

In combination with IFC 300 signal converter	Accuracy	Curve
DN25...1600 / 1...64"	0.2% of mv + 1 mm/s	1
DN1600...3000 / > 64"	0.3% of mv + 2 mm/s	3

In combination with IFC 100 signal converter	Accuracy	Curve
DN25...1200 / 1...48"	0.3% of mv + 1 mm/s	2

6.5 Dimensions and weights

Remote version		<p>a = 77 mm / 3.1"</p> <p>b = 139 mm / 5.5" 1</p> <p>c = 106 mm / 4.2"</p> <p>Total height = H + a</p>
Compact version with IFC 300		<p>a = 155 mm / 6.1"</p> <p>b = 230 mm / 9.1" 1</p> <p>c = 260 mm / 10.2"</p> <p>Total height = H + a</p>
Compact version with IFC 100 (0°)		<p>a = 82 mm / 3.2"</p> <p>b = 161 mm / 6.3"</p> <p>c = 257 mm / 10.1" 1</p> <p>Total height = H + a</p>
Compact version with IFC 100 (45°)		<p>a = 186 mm / 7.3"</p> <p>b = 161 mm / 6.3"</p> <p>c = 184 mm / 7.3" 1</p> <p>Total height = H + a</p>

1 The value may vary depending on the used cable glands.

**INFORMATION!**

- All data given in the following tables are based on standard versions of the sensor only.
- Especially for smaller nominal sizes of the sensor, the converter can be bigger than the sensor.
- Note that for other pressure ratings than mentioned, the dimensions may be different.
- For full information on converter dimensions see relevant documentation.
